

APPENDIX 4 (EXPENDABLE SUPPLIES STOCKPILE) to ANNEX W

1. This Appendix delineates the types of protective and decontamination supplies required to meet most emergencies involving infectious animal and poultry diseases. The listing contained in this Appendix is intended to provide a five day supply of essential supplies to workers that enter the quarantine area. These items will be collected for destruction prior to personnel leaving the quarantine area.
2. The stocks shown on the next page will be stored in a centrally located and secure facility to be determined with contingency transportation arrangements coordinated in order to deliver these items to the area of the local quarantine within six to eight hours after notification.
3. Stocks will be stored in team set configuration to facilitate upload of materials for deployment to the incident site. Appendix 7 list organization details of the separate teams.

APPENDIX 4 (EXPENDABLE SUPPLIES STOCKPILE) to ANNEX W
